

CRIMSON PAC

GENERAL DESCRIPTION

Crimson PAC is a buffered alkaline detergent that has proven to be more than an effective substitute for caustic soda cleaners. Due to its formulation of buffers and mild alkalis, it is safe on skin, soft metals, and plastics. Crimson PAC is used to penetrate carbon or protein soils and is not affected by hard water.

Crimson PAC is a very effective CIP cleaner that is particularly useful for removing soil found on brew kettles, conditioning tanks, filters, and fermenters. In addition, the blend does not require the excessive heat of typical caustic cleaners.

BENEFITS

- ◆ Replaces Caustic soda
- ◆ Free Rinsing
- ◆ Safe to handle
- ◆ Removes protein soil, carbon, and fatty acids
- ◆ Effective at all Temperatures
- ◆ Safe on Polycarbonate surfaces
- ◆ Generates 5% Oxygen
- ◆ Excellent hard water tolerance

DIRECTIONS FOR USE

CIRCULATION CLEANING: Use 1-3 oz. per gallon, Heat to 130° to 180°F for 30 minutes.

CARBON REMOVAL: Use 6-8 oz. per gallon of water. Heat to 140°F for 4 hours or allow to soak cold overnight. When using Crimson PAC in brewing areas, cleaned equipment must be rinsed with potable water.

SAFETY

DANGER: Harmful if swallowed. Can cause eye irritation. Contains sodium metasilicate and sodium carbonate.
